OUETTA VOICE

Information Commission Balochistan: Why this delay

Dational Statis. Willy this detay.

Almost a year passed, the Balochistan government is yet to establish the Information Commission (IC). The provincial assembly had adopted the Right to Information Bill in February 2021 amid the uproar. The opposition lawmakers had expressed reservations over the bill and called for amendment. Nevertheless, the treasury members adopted the bill.

The Balochistan cabinet had approved the RTI Bill in August 2020. Since then, the government has not taken any practical steps to establish the Information Commission. All three provinces and Islamabad have formed RTI commissions empowering citizens to seek information decisions. The February 2021 RTI bill empowers citizens to seek information/details. The February 2021 RTI bill empowers citizens to seek information/details of development projects, jobs, quality of work, official decisions about government departments. Since the passage of the bill, the Balochistan government has not discussed the formation of the IC.

Punjak, Sindk, Rhyber Pakhtoonklova formed ICs.
Other provinces have also appointed chief information commissioners and information commissioners to devolve information at graseroots level. The commissions have made various decisions regarding government departments.

commissions have minde various accessions regarding government objuntaness.

Undoubtedly, RT1 is an effective instrument to promote democratic institutions and eradicate the curse of corruption from the country. Information is considered to be one of the powerful tools to ensure transparency in the utilization of funds and appointment of candidates on government jobs. Above all, it plays key role as a watch dog about major government decisions.

RT1 plays key role in ensuring good governance. RT1 is also very crucial in the establishment of good governance in the country. People of Balochistan continue to suffer because of worst governance. The province is lagging behind other provinces of the country in terms of key social indicators including eduction, health, sanitation, clean drinking water efe.

of key social indicators including eduction, nearin, santanion, cican drinking water etc.

For Balochistan, the establishment of IC is indispensable since the people enjoy the right to information but with no proper platform to lodge their protest. Chief Minister Mir Quidus Bizenjo led government should go better with the location of the protect of

New national security policy

Last week the fed-eral cabinet approved, what the government claims, Pakistan's first-ever Pakistan's first-ever national security policy. The policy has yet to be made public but is believed to have covered all internal and external aspects. National Security Adviser Dr Moeed Yusuf is the man behind the new national security policy. He must have given a true assessment of the situation and suggested a way and suggested a way forward on the curforward on the current precipice given the fact that before taking up the government job, Moced used to say all the right things through his writing and opinions. In fact, his views were not different from those who are often branded as anti-state or traitors.

Pakistan is complex problems but at times complex problems but at times complex problems have sim-

news suggestions and ideas given the multiple problems facing the country. The new polley may have been spread over hundreds of pages but if we are to pull the country out of the current quagmire perhaps a one-page document would do the job. The key issue we need to figure out first and foremost is whether Pakistan is a security state or welfare state. Certainly, the founders of Pakistan wanted to see it as a welfare state but because of our internal follies and external factors the country has for decades been seen as a security state.

In the new policy we must strive for getting rid of this tag. How that can be achieved? The state has to do course cor-

rection Rule of law and adherence to the Constitution by all state institutions and the policy steeks its functionaries is a perquisite. Every midividual, no matter how powerful, has to be answerable. No holy cows. Political stability is paramount for any sustability is paramount for any sustable for the formation of the sustable for the formation in human security. But your paramount for that the constitution is policy seeks transformation in pulcipacity and sustable for the great for the sustable for the formation in human security. But your paramount for that your paramount for the formation in human security on human security. But your policy seeks transformation in pulcipacity and provided from the formation in human security. But your paramount for the formation in human security on human security and policy seeks transformation in human security. But your policy seeks transformation in human security on human security of the formation in human security of the policy seeks transformation in human security on human security. But your policy seeks transformation in human security of the policy seeks transformation in human security on human security of the policy seeks transformation in hum state institutions and its functionaries is a prepaisite. Every individual, no matter box powerful, has to be answerable. No holy cows. Political stability is paramount for any sustained economic growth and reforms. No matter what type of a policy is drafted, nothing will change unless we stop manipulating election results and conspiring against elected governments. Use of religion for the purposes of advancing political goals is another disease that has wreaked havoe in our society. The policy of relying on non-state actors and religious groups to pursue strategic objectives has cost used to the proposed to the proposed objectives has cost used to the proposed to proposed to the proposed to propo

Kamran Yousaf increased trade and commercial ties may create inter-dependencies, perhaps leading to the resolution of disputes. Proponents of that approach cite the example of India-China rivalry. The two countries are engaged in territorial disputes over which there have been bloody exchanges at the border in the last couple of years, yet Kamran Yousaf the border in the last couple of years, yet the bilateral trade figure between them is astonishing, having touched a record \$114 billion this year. This burgeoning trade between the two Asian countries will prevent an all-out war since the stakes are too high. Can Pakistan also

stakes are too high.
Can Pakistan also
think on these lines?
Certainly, it is not
going to be an easy
proposition but
that's what the new
security policy must
focus on — finding
